INSTALLATION INSTRUCTIONS

Fixtures are mounted by provided stainless steel mounting brackets without violating watertight integrity.

Step 1
Secure stainless steel mounting brackets to the mounting surface. The brackets can also be attached to chains or 1/4” threaded rods.

Step 2
Remove the lens from the enclosure unit.

Step 3
Press the fixture housing into the mounting brackets, making sure both sides of the fixture edges are firmly secured by the brackets.

Step 4
Re-install the lens, making sure all eight latches are tightened.

Note:
Use pre-installed watertight hub(s) to maintain the water seal when connecting the fixture.
